solupak 2007

Welcome to Solupak 2007. Flavour SA, the food industry association inc, in collaboration with Food South Australia, The Centre for Innovation and TAFESA North - Regency Campus are pleased to be hosting Solupak 2007, South Australia's premier food packaging, processing and technology Exhibition and Forum for the food and beverage industry.

The Exhibition, running over June 4th and 5th 2007, at the International Centre at TAFESA North, Regency Park, includes 30 exhibitors, presentations, workshops, machinery and equipment demonstrations.

All elements of the Expo are focused to stimulate awareness of new trends, provide practical solutions and interaction with suppliers that can improve business performance and profits.

Take the time to look through the program. Registrations are available online at <http://mybookingmanager.com/solupak>. Each registration includes attendance for one person at the Cocktail Party. All delegates will receive an official Solupak bag on their arrival along with their nametags.

The Solupak Cocktail Party, which provides exhibitors, delegates and special guests the opportunity to continue networking, will be held on 4th of June in the Graduates Restaurant at the International Centre from 6pm - 8pm. Maurice Crotti, Chief Executive Officer, San Remo Group of Companies will be the guest speaker for the event. If you wish to purchase further tickets for the cocktail party, please do so at <http://mybookingmanager.com/solupakcocktailonly> for \$25 per person including GST.

Parking is available on the campus and attendants will be assisting in directing delegates to parking areas at high peak times during the day. Please refer to the site map, which can be downloaded upon registration for details on parking.

On behalf of Flavour SA, Food South Australia, The Centre for Innovation and TAFESA North - Regency Campus, we thank all the sponsors - Howden Printing, Dominant Australia and IMCD for their support in this event.

EXHIBITORS: Solupak 2007

RAW CREATIVE: An exciting studio that specialises in designing dynamic new products and giving an existing brand a creative, fresh, edge. A product only ever has one opportunity to make a first impression make an impact!

ROYAL SOCIETY FOR THE BLIND: The RSB at Gilles Plains employs approx. 75 people who are blind or vision impaired. The RSB offers a complete service: Pressure formed products including: Manufacture of clamshells, food grade containers, folded and heat sealed blisters. Packaging & Assembly: Assembly and general packaging, food packaging (secondary), Shrink-wrapping, Heat Sealing and Blister Packaging.

HOWDEN PRINTING: Howden Printing provide excellence in printing, offering complete artroom solutions, adhesive labels, packaging, promotional posters and brochures from one site. Specialising in the Boutique Food Industry they are a Quality Assured South Australian owned and operated company offering continuity of service and experience by a long serving team.

GREENBROOK: Greenbrook food safety provides food safety solutions and food safety technology. Greenbrook offers a range of services including HACCP compliance, food safety plans, training and consulting. The food safety technology we supply and install will allow you to focus on your business while ensuring compliance to legislation and saving significant staff resources.

IMCD: IMCD Australia is involved in the distribution of functional food ingredients, industrial chemicals and processing aids used in a wide variety of industries in Australia. Our aim is to provide not only warehousing and logistics but importantly value added solutions via our high level of technical support.

UNITED LOGISTICS NETWORKS: Offering Bee 1 Stop: a virtual food and beverage store where buyers can find and buy what they need from participating suppliers...all from one site. The Internet will bring the whole world to your door allowing you to buy and sell 24/7.

DATANET: Wholly owned Australian IT Company assisting companies to succeed through the effective use of mobile and wireless computing technologies

MASTER BUTCHERS: Suppliers of packaging, ingredients and machinery to the meat, bakery and food service industries.

INNOVIA FILMS: Innovia Films is a major producer of specially Biaxially Orientated Polypropylene (BOPP) and cellulose films with production sites in the UK, USA, Belgium and Australia. Innovia Films hold a leading global position in the markets for labels and security films, high performance coated packaging, tobacco overwrap and biodegradable and compostable films.

ACCUWEIGH: The Australian leaders in weighing, packaging, process control and "End of Line" inspection equipment.

BUDPAK: Manufacturers of gross and net bagging scales. Specialist design and manufacturers of complete turn-key, "one-off" packaging systems for specific requirements.

FIONA BAVAGE DESIGN: Graphic designer specialising in brand development and packaging design for the food and wine industries.

HUMITECH AUSTRALIA: Humitech Australia has a unique, environmentally friendly, mineral based Humidity Control System for refrigerated and freezer environments. Humitech filters contain a mineral called 'Sorbite', which absorbs and de-sorbs humidity, eliminates odours, increases storage life of food, lowers the ambient temperature of refrigerated environments, eliminates ice build ups in freezers, reduces the running costs of refrigeration, plus many other benefits.

TRISTAR ELECTRICAL: Tristar Electrical offer a complete range of electrical, automation and installation services to the food processing industry including turnkey projects, project management, engineering design automation, electrical installation and breakdown repairs.

BIOLAB: Biolab (Aust) Ltd is Australasia's largest and leading provider of scientific instruments and consumables. Our core laboratory products are supplied to a broad range of markets including the food and beverage industry. Our products include laboratory and bioscience equipment, technical consumables (chemicals & microbiological products) and general laboratory consumables. Our microbiology range include tests for pathogens (food born bacteria/fungi) natural toxins, allergens and enzymes. An extensive range of sanitation monitoring systems is also available.

PROVISOR: Provisor is a major national research facility providing facilities, equipment and services for research into variables affecting wine quality, style and price through the wine value chain. This same expertise is now being applied to the food manufacturing industry through the following services: research management, product and process development, sensory evaluation, and specialised chemical analysis.

DOMINANT AUSTRALIA: The Food Safety Division of Dominant Chemicals is committed to providing safe food and beverage. Dominant's Food Safety program greatly increases food and beverage manufacturers odds of producing safe food on a consistent basis. Dominant's range of cleaner and sanitisers provide food processors with a comprehensive approach to food safety when utilized through our Food Safety program

DEBNEY DISTRIBUTORS LTD: Suppliers of commercial catering and food processing equipment.

SILVERLOCK: Established in 1976. Silverlock Packaging supply retail and industrial packaging products and material handling solutions to a diverse range of industries across Australia. We pride ourselves on our market reputation of superior service and attention to detail. We are a Quality Assured Company, compliant with the ISO900.2003 Standard.

OOMIAK: Oomiak Pty Ltd is the new face in industrial refrigeration, but there is nothing new about the know-how of its team, which combines around 60 years experience in industrial and commercial sectors. In particular, team members have played a significant role in the design and development of a substantial percentage of major refrigeration projects across Australia.

MURRAY PEST CONTROL: Food and pests don't mix. Rats and mice, cockroaches, flies and other pests carry disease and when they contact food, their disease is passed on to humans. Murray's dedicated Commercial Division applies Integrated Pest Management techniques and provides comprehensive reports to ensure AQIS, HACCP and Australian Food Safety Standards are met. From manufacture to storage and processing to retail, Murray's has the experience to manage pests at all points along the Food Industry chain

PROFILE PACKAGING: Design and delivery of specialist food grade packaging using a range of Australian product manufacturing capabilities

BEDFORD INDUSTRIES INC: A not-for-profit organisation dedicated to enhancing the lives of people with a disability. South Australia's largest and most diverse provider of employment, training, residential services and life skills for people with a disability. Services include Bedford Packaging

PROCESS PLANT NETWORK: Supplying new and used process and packaging machinery to the Food, Pharmaceutical and Chemical Industries

NEXUS PRINT SOLUTIONS: Nexus Print Solutions incorporating Gillingham Printers & van Gastel Printing is about providing quality printing and packaging at competitive prices with personal service. A company rewarded for excellence nationally and internationally with 158 years of combined experience.

OXOID: Supplier of a range of Microbiological, Food Allergen and Hygiene monitoring kits for the food and beverage industries.

FX CREATIONS: Offering sales & service in packaging systems, consumables, branding and designs

Tronics: Supplier of locally designed and manufactured label application machinery and product identification systems.

BLACK SQUID DESIGN: Black Squid Design has established a reputation for creative and effective packaging, brand identities and corporate communication. Their work has won numerous national awards and has been published in both national and international publications.

TAFE SA NORTH – REGENCY CAMPUS/ADELAIDE UNIVERSITY: Leading provider of education and training services to the food industry
