# What is **Bee1Stop**?

**Bee1Stop** is a virtual food and beverage store where sellers can offer their products for sale, and buyers can find and buy what they need – all from one website.

Our online find and buy service is ideal for consumers, retailers, the food service industry, producers and suppliers. If buyers can't find something, we do the leg-work for you.

The screenshot displays the Bee1Stop website interface. At the top right, navigation links include Home, Member Login, Register, My Bee1Stop, and Log Out. The main header features the Bee1Stop logo and the text 'Find & Buy'. Below the header is a banner with images of various food items: vegetables, fish, bread, grapes, and wine. A red banner below the images reads 'Find and Buy Directory for Consumers, Producers and Suppliers in the Food and Wine Industry.' On the left side, there are buttons for 'Member Login', 'Register Here', and 'Bee1Stop Explained' with a stick figure icon. The central search area contains a search bar with 'honey' entered, a '15' dropdown, and a 'Find...' button. Below the search bar are links for 'My Preferences' and 'Advanced Search'. A list of product categories is displayed, including Food/Beverage/Tobacco Variety Packs, Cereal/Grain/Pulse Products, Tobacco/Smoking Accessories, Beverages, Prepared/Preserved Foods, Bread/Bakery Products, Seasonings/Preservatives/Extracts, Confectionery/Sugar Sweetening Products, Oils/Fats Edible, Seafood, Fruits/Vegetables/Nuts/Seeds, Milk/Butter/Cream/Yoghurts/Cheese/Eggs/Substitutes, and Meat/Poultry/Game/Batrachian. At the bottom of the search area are links for 'Search' and 'Shopping Cart'. A copyright notice at the bottom reads '© 2006 United Logistics Pty Ltd. All rights reserved.' On the left side of the main content area, there is an image of a person carrying a large stack of cardboard boxes.

## Who are **Bee1Stop** users?

---

-  Buyers searching for a new product or customers wishing to replenish existing supplies. This includes any buyer of food and beverage products, including retailers, the food service industry and individual consumers.
-  Food producers looking for new customers and a way of improving their service. We are also an excellent resource for producers seeking new raw materials or suppliers for their production process.

## Why should buyers use **Bee1Stop**?

---

Because we offer a fast, cost-effective and efficient way of buying food and beverage products

Buyers have their own secure pages on our site so they can:

-  Find and buy what they want from one website rather than dealing with multiple supplier sites.
-  Contact potential suppliers through our site and track the response so that information is never lost.
-  Buy at prices that have been negotiated and pre-set with the supplier. (**Bee1Stop** also handles international currencies.)
-  Place orders electronically (particularly useful for large retailers) or use a web browser with a secure password.
-  Create various lists of favourite suppliers, which makes it easier to re-order products. Buying lists can be broken into categories, such as wine, oils, dairy or condiments, and they can be updated at any time.
-  Depending on the carrier used, track purchase orders from initial signing to delivery (available mid-year).
-  Review old purchase orders, track financials, download purchase order information into their accounting system and make a single payment for multiple goods bought from multiple suppliers.

# What does **Bee1Stop** offer producers and suppliers?

---

Greater exposure to potential buyers, increased sales, improved administration and reduced order management costs.

This is possible because **Bee1Stop** offers suppliers:

-  Presence on a website that is highly ranked by search engines, such as Google.
-  An ordering process that local, national and international buyers will find easy to use.
-  Improved administration with the ability to track and respond to buyer enquiries. Records are kept online which means there is no more lost documentation.
-  Compliance with GS1 and other retailer numbering and product classification requirements.
-  A system of receiving orders by email, SMS or fax, with an option to view orders within BeeWorks, an associated business tool for managing orders, transport and financial documents.
-  Freight management tools (available mid-year) with tracking of deliveries depending on carrier used.
-  Automatic raising of invoices that can be downloaded to your financial system.
-  Orders can be sent to distributors if they are responsible for product shipment.

# How can you be part of **Bee1Stop**?

---

The process is straightforward for both buyers and suppliers.

## Buyers

Buyers can browse **Bee1Stop** for products at any time, but need to be registered if they want to make a purchase. This simply involves applying for a user name and password. There is no fee for buyers using the **Bee1Stop** service.

## Sellers

**Bee1Stop** offers two levels of services for sellers.

### 1 Web presentation of company and product profiles

For sellers, **Bee1Stop** prepares and hosts company and product profiles on a supplier specific web page – a process that involves none of the usual website set-up and maintenance costs.

We collate information from existing websites or other supplied materials, and provide the tools, and prompts, for you to keep the information up to date.

Once you confirm the information is correct, it is posted live on the **Bee1Stop** website. The service is free for the first six months and then charged at \$65 per month.

### 2 Electronic Trading

To take advantage of the selling options within **Bee1Stop**, sellers will load their customer specific prices against items for sale. These prices are visible only to the buyers that you choose.

**Bee1Stop** charges suppliers a fee negotiated on the value of the transaction, or discounted depending on the total amount of business.

<b>Brand Name</b>	Buzz Honey
<b>General Score</b>	Buzz Honey is a family owned and operated honey producing business nestled in the picturesque Adelaide Hills. Apiaries are spread throughout the Adelaide Hills and beyond, allowing us to hand gather different types of nectar many of which are unique to the dry South Australian climate. The process of hand gathering selected honeys ensures unique honey flavours to be fully retained and enjoyed. We take pride in ensuring no antibiotics are used, the honey is processed using a minimum of heat and all flavours are unblended and as close to nature as possible. Buzz Honey is gaining a reputation for producing unique, award winning honeys.
<b>Packing</b>	60g glass gourmet jars (boxes of 12, single or mixed flavours) 1kg plastic tubs with metal handle and yellow lid (boxes of 4, single or mixed flavours) 1 1/2 kg plastic tubs with metal handle and yellow lid (boxes of 4, single or mixed flavours) 1 kg plastic tub (can be used for food service) with safety seal (boxes of 2) Soon to be released: 140g glass hexagonal gold screw top lid (boxes of 25)
